Professional Summary

I'm a front-end developer with more than 7 years of experience crafting responsive, user-friendly, and visually stunning web interfaces. I work with HTML, CSS, JavaScript, and popular frameworks like Bootstrap, React, Next.js, GSAP, and jQuery. I'm also skilled in design tools such as Figma, Adobe Photoshop, and Illustrator, as well as CMS platforms like WordPress, Wix, Shopify, Joomla, and Drupal. My background includes working with PHP, SQL, and various hosting environments like Bluehost, GoDaddy, Hostinger, and HostGator, all while keeping a keen eye on SEO, website speed, and optimizing for Core Web Vitals. Right now, I'm pursuing a Bachelor of Computer Applications (BCA) at Chandigarh University, set to graduate in 2028. I love collaborating with UI/UX designers and back-end developers to create top-notch digital experiences.

1

Professional Experience

Web Developer / Design Specialist as (Web Developer (Grade A2))

GreyBit cloud, Chandigarh, India.

from 2023 (1y. 9m) Full time (Remote)

Experienced Web Designer with nearly 2 years of expertise in designing and developing user-friendly, secure, and performance-driven websites. Skilled in creating responsive website templates and delivering solutions for both B2B and B2C clients.

Key Responsibilities & Achievements:

Designed and customized website templates with modern UI/UX principles.

Developed and maintained B2B and B2C websites, ensuring seamless user experiences.

Implemented website security measures, managed hosting environments, and performed server/database administration.

Successfully identified and removed malware, restoring server integrity and enhancing security.

Optimized websites for SEO performance, boosting search engine visibility and traffic.

Integrated and managed Google Analytics for performance tracking and insights.

Developed and managed websites in Microsoft SharePoint, including data management and workflow support.

2

Professional Experience

Web Developer / Design Specialist as (Web designer)

Creative Peppers, Chandigarh, India.

from 2017 (6y. 6m) Full time (On-Site)

Designed, developed, and brought to life websites, layouts, and interactive elements that create smooth and enjoyable user experiences.

I also created and rolled out marketing programs that included everything from logos and brochures to infographics, presentations, and ads.

I delegated tasks to a small design team of two, offering guidance on design standards, coding practices, and ensuring we met our project deadlines.

While managing up to five projects at once, I thrived under pressure, always delivering on time and maintaining high-quality results.

I consulted with clients to find the best design and development strategies, presenting over four proposals each month for their approval.

I conducted thorough quality checks and performance analyses to guarantee accuracy, responsiveness, and optimization of our digital projects.

I boosted website performance through SEO enhancements, improvements to Core Web Vitals, and responsive design, which led to increased user engagement and quicker load times.
